Profile

Boundless Furniture Fittings(BFF) is a professional furniture hardware manufacturer that offers a wide range of business operations from research and development, and production to sales, providing cost-effective solutions for customers from a global perspective.

BFF has established a full-chain production system integrating pressure injection, electroplating, assembly, and packaging. The company introduced automation equipment to achieve efficient and collaborative operations from mold development to finished product delivery. Through standardized processes and precise quality control, we ensure product stability and delivery timeliness to meet customers' demands for both quality and production capacity.

BFF has built a diversified product matrix. For functional hardware products including multifunctional desktop sockets, silent hinges, high-load bearing slide rails, and smart drawer locks, both practicality and durability are taken into account. For space system products, such as kitchen pull-out baskets and wardrobe storage hardware series, modular designs are used to optimize space utilization. For certain products, we also offer tailer-made services, supporting personalized dimensions, materials, and functionality to flexibly meet customers' needs.

Currently, BFF's products are sold globally. The company has established long-term partnerships with customers in Germany, Poland, the Netherlands, India, Iran, South Korea, Indonesia, Malaysia, the United States, Peru, Brazil, Colombia, and Morocco. We are proud to have accomplished a consistent growth in annual sales as well as an increasing share in international markets.

BFF has always adhered to the philosophy of 'Innovation drives quality'. We focus on technology upgrades and cost optimization, working cooperatively with global partners to explore new opportunities in the furniture hardware industry.
